Moderator

TOYODA Keisuke

MIYAKE Youichiro

Research Fellow, IIS, The University of Tokyo

Closing Remarks

Fabio DUARTE

Principal Research Scientist, MIT Senseable City Lab
Massachusetts Institute of Technology

The symposium aims to bring together leading researchers and specialists from Japan and the United States to explore and advance our insights into today's emerging topics in integrating virtual and physical agents and spatial description systems.

The evening will feature keynote speakers from the Institute of Industrial Science (IIS), showcasing research in applying game engine to facilitate interactions between physical and virtual agents and spatial systems, presentations and discussions by speakers and panelists on the latest topics from related fields.
